EDUCATION

BS Computer Science

Pir Mehr Ali Shah Arid
Agriculture University,
Rawalpindi

Expected in 2026

Fsc pre-Medical

Star Science college, Hajira,
AJK
2021

SKILLS

- **Backend:** ASP.NET MVC, Node.JS (Learning)
- **Front-End:** HTML5, CSS3, JavaScript, Bootstrap, React.js (Learning)
- **Databases:** MySQL, SQL Server, MongoDB (Learning)

COURSES

Web Development
Devthrone Technology
2023

Amazon
Amazon course pk institute
2022

CAREER OBJECTIVE

Enthusiastic final-year BS Computer Science student at BIIT Pir Mehr Ali Shah Arid Agriculture University, Rawalpindi maintaining a strong CGPA of 3.58/4.0. Skilled in back-end web development with practical experience in building CRUD functionalities, integrating APIs, and managing databases. Eager to grow as a full-stack developer by securing a web development internship to apply my technical expertise and contribute effectively to real-world projects.

ACADEMIC PROJECTS AND TASKS

Crud Applications

Designed and developed robust CRUD (Create, Read, Update, Delete) functionalities for dynamic, database-driven web applications using ASP.NET MVC framework. Implemented efficient data models, controllers, and views to manage user input and ensure seamless interaction with SQL Server databases. Focused on writing clean, maintainable code and following best practices for secure data handling and validation.

RESTful APIs

Designed, developed, and integrated RESTful APIs for various course projects, enabling smooth communication between front-end and back-end systems. Focused on creating secure, scalable endpoints and consuming APIs to enhance application functionality and user experience.

Database work

Designed, implemented, and managed relational databases using MySQL and SQL Server to support web applications. Developed efficient queries, optimized data structures, and ensured data integrity and security.
